

ScreenBeam™ Classroom Commander License Model

As part of our commitment to our education customers, Actiontec® has adopted a perpetual licensing model for ScreenBeam Classroom Commander software. The perpetual license allows our customers to use the licensed software indefinitely. For the first year, the perpetual license also entitles our customers to download all standard updates to the software, standard device firmware updates, and to receive technical support.

After the one-year period ends, customers may choose to remain with their last downloaded version or purchase annual renewals which entitles customers to standard updates, and support for an additional year.

Classroom Commander licenses are associated with compatible ScreenBeam wireless display devices, not individual users. Teacher and Student applications are free of charge, but may only be used with Classroom Commander enabled ScreenBeam devices.

LICENSE FEATURES

- Classroom Commander Student and Teacher apps are free and can be downloaded from the Microsoft Store (UWP) or ScreenBeam website (MSI).
- Licenses start on the date the first receiver is activated, or 90 days from issuance of the license key, whichever comes first.
- Active licenses will be entitled to feature and maintenance updates for one year.
- Receivers with expired Classroom Commander licenses will continue to support previously active features. However, new features, support and some platform updates will not be available.

LICENSE DELIVERY

- A License Key will be provided upon purchase to activate the receiver(s) via email from sblicense@actiontec.com.
- Be sure to specify the correct user email address for License Key delivery upon order.
- For license and pricing details please contact your ScreenBeam sales rep or one of our Certified Elite Partners and mention catalog number SBCC01L.

ACTIVATION OPTIONS

License Activation Utility

- Suggested for manually activating a small number of units. This Windows application requires direct Miracast connection to the receiver.
- Utility and instructions are available in the Software section at <http://sup.screenbeam.com/sbcc>, or will be provided with License Key delivery email.

Central Management System (v2.6 or later)

- Recommended for remotely activating a larger fleet of units or units that are already remotely managed.
- Latest CMS software: <http://cms.screenbeam.com> or Zendesk CMS section.
- For CMS updates: <https://actiontec.zendesk.com/hc/en-us/categories/201274123-ScreenBeam-Central-Management-System-CMS->

DEMO MODE

- Classroom Commander demo mode supports one teacher and two student PCs.
- License activation is not required to use Classroom Commander in demo mode.
- Classroom Commander requires a ScreenBeam 960 Receiver with firmware v9.24.1.0 or higher.
- Classroom Commander Student and Teacher apps are free and can be downloaded from the Microsoft Store (UWP) or ScreenBeam website (MSI).
- Demo mode is active for 90 days.
- Request a trial at www.screenbeam.com/forms/request-a-trial
