ScreenBeam 1100

4K wireless display and collaboration

Designed for organizations requiring a high performing 4K universal wireless display and collaboration solution with multi-network support. Combining local Wi-Fi mode connectivity with industry standard Miracast™, and dual-network infrastructure connectivity with network bridge functionality, delivers unparalleled deployment options for employee and guest wireless presentations.

ScreenBeam 1100 delivers easy, app-free universal wireless screen sharing across multi-network enterprise configurations for employee and guest devices. Support for native screen mirroring functionality in Windows, Apple, Android and Chromebook devices eliminates downloading an app, or searching for the right AV cable, HDMI or DisplayPort adapter.

Windows and macOS users can share content in both duplicate and extended screen modes, and support for interactive touch displays and Windows Ink brings collaboration to the front of room display. ScreenBeam 1100 delivers an affordable, easy user experience, with advanced technology to provide simplicity and scalability for deployment and management.

---

**Key Features**

- Present from laptop, tablet or smartphone wirelessly
- Native screen mirroring solution; no app, no dongle
- Flexible in-room display sharing preference
- True extended desktop mode support
- Swift switching between presenters
- Optional secured and isolated Wi-Fi hotspot
- Windows 10 native wireless touch and inking
